REFUGEES' PROGRAM

We're proud to have partnered with "Drawit", a groundbreaking program that uses AI to analyze children's drawings. This innovative approach helps identify mental health challenges faced by the children, allowing us to better address their needs.

In addition, we continued our commitment to education by offering English classes for refugees. These included extensive revision sessions to solidify previous lessons, along with classes in oral English, writing, and conversation. By enhancing their language skills, we aim to open doors to opportunities and a brighter future for these individuals.

ORPHANS' PROGRAM

Covering Recent Progress in our Orphans Program, we focused on equipping caregivers in governmental orphanages with essential life skills. Training sessions covered topics like health and hygiene, empowering young individuals to take charge of their well-being. Additionally, caregivers participated in specialized workshops addressing vicarious trauma and reconciliation, promoting peace and forgiveness. These sessions are vital in creating a nurturing environment where children feel safe, supported, and understood.
